<p>La Grande nouvelle du 18 mai 2016, fut la naissance de notre premier bouquetin à La Garenne.</p>

<p><br></p>
<figure></figure>
<p>La surprise n'en était pas vraiment une, car nous avons déjà observé depuis quelques temps, qu'une des femelles du groupe était portante. Les premières heures furent compliquées car les mâles du groupe essayaient sans cesse de bousculer le petit sans que sa mère n'intervienne de façon déterminante. Mais après deux jours d'observations, tout ce petit monde c'est bien calmé et tout le monde va bien, tant le petit que sa mère.</p><div class="video-container"> <iframe style="width: 500px; height: 281px;" src="//www.youtube.com/embed/pvrwkKQNdlw" frameborder="0" allowfullscreen=""></iframe></div><p><br></p>
